Audits of damaged roads are still underway by our Flood Recovery team. VicRoads are due to assess some of the flood affected roads in the coming days to ensure they qualify for Natural Disaster Relief & Recovery Arrangements (NDRRA) funding.

WHAT ABOUT RECREATION ASSETS?
There has been widespread damage to recreation assets (eg. sporting ovals, recreation reserves and walking tracks) in our Shire.

The estimated cost of this damage is **$900,000**.

The works to repair damage to these assets will fall on Council, as it does not qualify for external disaster relief funding. This may impact Council’s ability to deliver it’s capital works budget and some projects may need to be suspended in order to ensure works can commence on these assets.

WHAT’S NEXT?
Interim emergency works have been carried out on some of our worst affected roads. These are temporary works that were done to make the roads safe, and they are now being audited. Once the VicRoads assessment is complete, we will be able to give an indication of when some of the more permanent works will begin.

We are prioritising works based on:
- Ensuring Community and road safety
- Protection of assets
- Provision of safe access to property
- Based on function of road.

**Emergency works completed:**
- Merrifield Road, Clunes
- McLennans Road, Clunes
- Kellys Lane, Glengower
- Fawcett Drive, Clunes
- McVor Road, Glengower
- McVicars Road, Glengower
