

# Ramps free to hire

## Threshold Ramps

Threshold ramps are a great solution for all those annoying small bumps that constantly confront us. They drastically reduce tripping hazards and are very useful for people with wheelchairs, walking frames, strollers, prams or delivery trolleys.

A fantastic solution for all those annoying small bumps that constantly confront us. These small obstructions can trip up a fit and healthy person, or tip anybody out of a wheelchair, walking frame, or stroller.

These easily portable ramps, made from maintenance-free, re-cycled rubber compound, are much lower in cost than cement or metal plates, and meet access and mobility gradients of 1:8.

Threshold Ramps can simply be laid in place, as they are naturally of low-slip co-efficient, or can be permanently fixed using industrial adhesive. What could be easier or simpler than that?

These Threshold Ramps have so many applications for people with wheelchairs, walking frames, strollers, prams, or delivery trolleys, and also drastically reduce tripping hazards.

### Features Include:

- Can be modified to suit any obstruction under 50mm
- Made from re-cycled rubber compound
- Portable and easy to install
