

Bins will be arriving
early – mid March

There's a new **ORGANICS BIN** in town!

Soon you will receive a new **organics bin** to collect your food scraps and garden waste for processing into compost*.

As part of these changes you will receive:

- A 120 litre organics bin with lime-green lid
- A kitchen caddy
- An instruction booklet with more information on how the service works.

WHAT CAN GO IN?

Food scraps

(raw and cooked),
meat, dairy and more.

Garden waste

Lawn clippings, prunings,
branches, weeds.

Note: Your bin doesn't need to be full to place it out for collection.

*The trial organics service will be for residents currently with a Clunes township weekly landfill kerbside collection. Residents won't have the option to opt out of the trial and return the bin, we encourage you to participate to the best of your ability.
